KARCHER DESIGN – Contemporary door and window hardware with exclusive fixing technology

KARCHER DESIGN provides an extensive range of contemporary lever designs as well as window handles, door pulls, and accessories. In our exclusive product range, customers can create their own personal, optimum combination of door handle model and escutcheon variant. Whether made of stainless steel or zamac: Our customers can choose from a wide range of colours, from the classic stainless steel colours satin and polished to the color combination chrome/chrome satin and the new trend colors oil rubbed bronze and cosmos black. German engineering assures excellent functionality and years of worry-free service.

KARCHER DESIGN is based in southwestern Germany in the state of Baden-Wurttemberg which borders both France and Switzerland. The area has a long history of industrial design and manufacturing and is home to the leading automotive companies Mercedes Benz, Porsche and Audi.

KARCHER DESIGN NA, located in Seattle, is a fully-owned subsidiary of the parent company. Its focus is to provide customer service and product distribution to the growing North American market. In choosing Seattle, Karcher found a home with a climate very much like that in Germany and a thriving high-tech community that will provide inspiration for future product innovation.

KARCHER DESIGN supports door and hardware showrooms, architects, and contractors. Our qualified customer service team assures a smooth and accurate ordering process as well as expert service after the sale. All products are kept in stock at high inventory levels. So whether your project is a single door, a sports stadium, or a high-rise condominium, delivery will be prompt and complete.
KARCHER DESIGN – The quality choice for the discerning customer.

CONTENTS
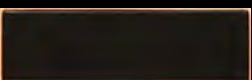

PRODUCT ADVANTAGES OF THE THREE PIECE ROSE SYSTEM

KARCHER
DESIGN
GERMANY

28° degree latch

one side preassembled

casted mounting plate with precision threading

standard door thickness (1 1/4" - 2")

stainless steel inner plate to hold lever and allows quick assembly

pin for privacy function (as option)

stainless steel threaded ring for a secure and save installation

AXIOM DESERT HOUSE - ARCHITECT HOUSE

What is characteristic for a perfect house? Architects Joel and Meelena Turkel, the founders of Turkel Design have dealt with this question for over a decade.

"Maximizing flexibility and energy efficiency through the application of high-tec materials in sustainable and well thought out living environments."

Foto: Turkel Design

The carefully selected high-quality products give the house a special charm. The products of KARCHER DESIGN are a perfect match to the modern furnishings of the house and make walking through the rooms and architectural experience.
